Bauer Introduces New EconoTest Test Stand Series

BRISTOL, Conn., - With EconoTest, Bauer introduces a test stand series designed with the medium market in mind and is distinguished by its affordability and reliability. Bauer has been manufacturing top-quality equipment since 1916. With its traditional test stands, Bauer has up to now offered a range of equipment that typically catered especially to the higher end of component testing meeting elevated requirements in terms of automation, complexity, and flexibility.

All the Quality Features

With EconoTest, Bauer has launched a test stand series of straightforward design which boasts all the quality features of Bauer equipment: reliable, economical, durable, and easy to operate. "Our EconoTest series of test stands have been designed with the medium market in mind," explains Lou Auletta, Jr., President & CEO of Bauer. "In this market segment, we understand the realities of our customers' business model that we need to meet. EconoTest is therefore geared in this environment to lean companies which repair and overhaul a variety of components and therefore require a high degree of flexibility, but with relatively low complexity. Nevertheless, test conditions have to be achieved in accordance with CMMs and accuracy must always be met. EconoTest satisfies these requirements."

Long Service Life, Easy Operation

As "genuine" Bauer equipment, EconoTest has all the capabilities expected in state-of-the-art component test stands. EconoTest is distinguished by its practical value and reliable engineering. "When it comes to selecting the system components and the manufacturing process, we are uncompromising," says engineering team leader Joel Kuczenski. The EconoTest series is matched precisely to the needs of the medium market and blends smoothly with the existing product portfolio of Bauer. Much attention is also paid to ease of operation. A clearly structured and easy-to-understand operating system allows fast entry into production with a low training requirement. A high uptime is achieved through the use of proven components. The optimized design of the test stand systems and the targeted reduction of the number of components minimizes the maintenance and training requirements for maintenance personnel.

Shorter Delivery Times, Highly Responsive Service

The EconoTest series is available as standard equipment, but can be equipped with additional options. The delivery times for the equipment are much shorter. Fast start-up minimizes costs and ensures rapid commissioning. Bauer maintains a global customer

service network with our partner DAES Services. Locally stationed trained service technicians ensure fast responses whenever the need should arise. EconoTest offers renowned Bauer quality, but with a more straightforward scope of functions and performance at an attractive price.

About Bauer

Bauer, established in 1916, designs and manufactures aircraft component test and support equipment for the commercial and military aviation industries. Leading OEMs, airlines, MRO and military organizations around the world rely on Bauer for technical expertise, highly reliable performance, and long-term support.
